

**FOR IMMEDIATE RELEASE:**

## **MESTECH Services announces ISO 9001 certification of its Quality Management System**

***Pune, India - November 28, 2013*** – MESTECH Services (MESTECH), a leading global supplier of Manufacturing Operations Management (MOM) / Manufacturing Execution (MES) solutions, announced today that its Quality Management System – MESTQ™ (MES Total Quality) is now ISO 9001-2008 certified. The certification covers all the core processes needed to deliver quality solutions and services: Business Development, Project Initiation, Design & Development, Internal Testing, Integration & Testing, Release, and Support.

Customer satisfaction is the core of MESTQ™. It is designed to deliver the highest quality solutions and services on-time and within budget. Transparency and auditability is maintained throughout all processes, starting from initial proposal stage through customer support phases.

“In a highly regulated industry such as life sciences, compliance is a key driver for all decisions related to supplier selection. Very stringent quality standards and procedures are in place for procuring products and services. It is imperative that supplier’s products and services adhere to the strict guidelines and have been thoroughly validated. A well thought of Quality Management System builds confidence in the supplier and can also help support successful closure of audits” – Mr. N. Thyagarajan, Consultant – Life Sciences Industry.

MESTQ™ comprises of core business processes and key support processes which convert inputs to value added outputs to achieve business objectives. These core business processes are integral to the business functions of MESTECH. The effectiveness of these core processes is enhanced and supplemented by support processes, which span across the entire organization. This in turn provides a clear focus on the requirements that are critical for a business to be successful.

“At MESTECH, quality has always been an integral part of processes, solutions and services. As a matter of fact, quality has been embraced across the organization as a way of life. Today, the formalization of our expression of quality – MESTQ™ – is a significant milestone that communicates

this commitment to all our external stakeholders.” – Mr. Yatin Sankholkar, Director of Life Sciences at MESTECH.

“Our commitment to quality is not limited only to the regulated industry. Our methodology helps customers in various industries like Automotive and Discrete unlock the unrealized value in their business operations, and achieve increased revenues at significantly reduced operating costs.” – Rodney Neal, Business Manager, NA at MESTECH.
